Public Safety Redefined: Thermal Imaging

FLIR A400/A700 Smart Sensor

Accuracy: ($\pm 2.5^{\circ}\text{F}$) FDA Approved

Facial Recognition: No

Works with CSA360

Thermal Smart Sensor Camera has the features automation solution providers need for complex monitoring applications, including elevated skin temperature screening when used as an adjunct to other body temperature. The Smart Sensor configuration includes multiple measurement tools and alarms, with analytics performed at the camera level for immediate results.

IDWare IRT1

Accuracy: $\pm 0.2^{\circ}\text{F}$ within FDA guidelines

Facial Recognition: Yes

Works with CSA360

Contactless Infrared Thermometer detects all visitor's temperatures at points of entry. After a no-contact scan, the thermometer will display the visitor's exact temperature on screen and notify the visitor whether their temperature is in the healthy range. This temperature monitoring solution removes the guesswork out of your business's operations. Maintain a healthy and safe workplace with unbiased data captured by the contactless infrared thermometer. An ideal point of entry solution for campuses, offices, lobbies, and events, this device is easily transportable to regulate your environment, whatever it may be.
